## A LETTER FROM THE PRESIDENT OF THE DCLIR BOARD OF DIRECTORS

Dear Friend of Door County Learning in Retirement,

Greetings, Gentle Reader. I sincerely hope you and your family are staying healthy during the time of Covid-19 and distressing national events. I have been busy planting pansies and petunias to feed the chipmunks and bunnies. You may have been, too. Home exercise also takes time. Personally, I thought the dryer was shrinking my clothes. It was the Refrigerator! So when you step on the scale, if you notice the Furlough 5 or Quarantine 15, Eeeeekkkkk! Let's turn to a happier topic.

We are pleased to present the Fall 2020 catalog and opportunity once again to participate in Door County Learning in Retirement. Classes will look different. Because of the Pandemic, we are offering many wonderful classes online using Zoom. If you do not have Internet at home or are uncertain of accessing the app, assistance will be available through the DCLIR office. Please note that **masks are required on the NWTC Campus.**

Registration options are **both** the traditional paper by mail and online. We are rolling out the software program ProClass, which allows you to join DCLIR with a credit card, select and enroll in classes and communicate with the DCLIR office online. Assistance registering will be offered at NWTC through the DCLIR office. We welcome Dixie Luedtke, our new administrative assistant, working with Monica Nelson. Dixie, we are happy to have you on board!

This fall expenses of DCLIR are increasing. The additions to the budget include the annual cost of ProClass subscription, continuing insurance fees, and the prospect of supporting the cost of printing our catalog. Previously, NWTC covered the entire expense of printing, but budget constraints mean that we may need to assume some of this cost. Annual DCLIR membership will be \$70 per year/ \$50 per semester. We sincerely hope that you will continue to support DCLIR and try some online classes. All of us will be seeking mental stimulation and the opportunity to learn something new. Even remote social contact will be welcome. Remember that scholarships are available. A quip I read recently stated, "We Have Enough Youth. How About a Fountain of Smart?" Regaining youth may be just a pipe dream, but rejuvenating your Smart is definitely on the radar!

No Kickoff event will be scheduled this year. We remain hopeful about the Holiday Party on Dec. 1st! In the words of Yogi Berra, "The future ain't what it used to be." Let's make it a great Fall, nonetheless. We hope that you join in our enthusiasm for 'learning' a new way to continue LIFELONG LEARNING with DCLIR in FALL 2020.

Sincerely,

**Suzanne Holvenstot**

Most participants experience a sense of calm and relaxed breathing. As ever, listen to your own body and modify movements to accommodate your needs. spent on healthcare-related goods and services, 18% of the nation's gross domestic product. Beyond government healthcare programs, private insurance is also an important aspect of this issue. The current political campaign leading up to the November election has focused on "Medicare for All." Let's discuss this important issue from a non-partisan, factual perspective.

Back by popular demand! For more than 60 years, Chateau Hutter has begged the questions from visitors and residents alike: What is the story behind the crumbling resort on that beautiful piece of property between Sturgeon Bay and Egg Harbor? Writer Myles Dannhausen Jr. has asked himself that question for as long he could remember. A few years ago he set about digging for the answer and found much more than he expected: an eccentric developer with dreams bigger than his talents; a slick, lawsuit-happy lawyer more adept at cultivating enemies than enticing customers; a mind-boggling lawsuit that confounded judges and attorneys. Dannhausen tells the tale gleaned from dozens of interviews, court documents and archival video/images in a special presentation.

As music becomes heavier and more psychedelic, the charts are still dominated by Pop, Bubble Gum, and new teen idols. Soft Rock counters the Heavy Rock in the early 1970's and then yields to the Disco Era as we conclude the series. You will enjoy an extended "trip" down memory lane as we rock through the sounds and images of another decade of change.

The spectacular variety of life in South America is astonishing. Kate will contrast two iconic areas of the continent: the Galapagos Islands off the west coast of Ecuador and the Amazon River in equatorial Brazil. The relatively barren Galapagos Islands are home to an amazing variety of species, both above and below the

water. Iguanas, tortoises, the Blue-Footed Booby and their cousins were an inspiration to Charles Darwin as he developed the Theory of Evolution and, because of the great care taken by national and world interests, they remain so today. The lush tropical rainforest of the Amazon has its own spectacular variety of flora and wildlife including Pink River dolphins, piranhas and macaws. The challenge of keeping that variety intact in the face of the impact of greed and modernization is even greater today than before.
