Dear Human Resources Team

While Searching for entry level Web Developer opportunities, I came across your job posting for a Junior .Net Developer at Scholarships.com.. I am currently a student at Northeast Wisconsin Technical College (NWTC) and expect to graduate in Spring of 2020 with an Associate Web Developer Degree.

I am proficient in a variety of programing languages, and I can work content management systems. Over 6 years of customer service experience have taught me about working with a user base to deliver a top-quality experience. I work well with many different types of people and possess strong communication skills and take personal accountability very seriously. I have a passion for user-friendly design and following accessibility guidelines that will support your mission statement.

I am interested in talking more about the position and how my skills can positively impact the Scholarships.com Team in that role. I can be reached at (920) 555-1212 to set up a time to discuss this position further. I appreciate your time and consideration.
