Pick 'Em Challenge!

HOW IT WORKS

Determine what you think the Packers **Regular Season** record will be for 2019 (i.e. 12 Wins, 4 Losses; 6 Wins, 10 Losses). Also determine how many Total Points you think the Packers will score over the regular season. For example, if you think they'll score 24 points per game...the season's total points would be 384. If you see them scoring 14 points per game, the total would be 224. You do the math...we just need the season's total.

Record your predictions in the designated area at the bottom of this form and email to student.involvement@nwtc.edu. Good luck!

Winners will be determined first by season record, then closest total points.

Prizes awarded to 1st, 2nd and 3rd place!

Please submit your completed form by 5:00PM September 5, 2019.
